

# Peer Review for Pallavi Pattanashetti

Pallavi was excellent and very easy to work with. She works very quickly and is very skilled with everything that she did on the project. She is also very good at communicating for the project and made sure to check with us before committing anything and was very helpful. She got pretty much everything done by day three which was very impressive to me because she had two pages and I only had one and I was still on just making the boxes by the time she was working on her page responsiveness.

She was very patient with me and brought a calming energy to the group, as did Darcy. I felt that as a team we all worked very efficiently and quickly resolved any merge conflicts or just page conflicts in general. She was very quick to help me on anything that I could not figure out on my own and also communicated when she needed help. She would make sure that it was okay before leaving class to check if we needed any other help before she had to go, which I thought was very kind and admirable. Overall working with Pallavi was a pleasure and I would love to work on a project with her again!
