

## Peer Review of Darcy Rose

Working with Darcy has been very good, they are extremely talented at coding and I feel that I learned a lot from working with them this assignment. They were very communicative through the entire project and had no problem explaining things I didn't understand. They gave very good criticism while remaining respectful and explained things in a way that made the issues I have been having on previous projects finally click to me. Also they got all of their work done extremely fast, but continued to work to improve it over the days while confirming with us if the changes were okay every step of the way.

I believe they go above and beyond on their projects and that showed on this one as well and an example of that is making the links so they underline when you hover over them. It is a small detail but something that makes the website look more professional and overall improves the users experience. This is also a new thing I have learned and can use in future projects and assignments. Again it was very nice to work with Darcy and I would love to have a project with them again!
